

Prospect Point Townhomes Winter 2017-18 Newsletter

Winter 2017-18 is *almost* here! A few Prospect Point Townhome updates as we close out Fall and enter the Winter Season...

Unit Heat:

Please be sure to keep your heat on! We recommend setting your thermostats between 60 and 65 degrees for the Winter months to avoid freeze ups. Please also open the cabinet doors under your sinks to allow warm air to circulate- especially your kitchen sink! Site manager Dale will be completing the regular security checks, but please help us out by keeping the heat on even when you are not occupying the unit.

Unit Heat tapes:

Heat tapes in Prospect Point will be turned on soon (once we get a bit of snow on the roofs). Please be sure to leave them on to avoid ice buildup and roof leaks.

House Rules and Unit Rentals:

Please be sure to share house rules with your family, tenants, renters and guests. All documents can be found on line at http://www.srghoa.com/hoa_prospect_pt.html

Unit Rentals were discussed at the 2017 Annual Owner Meeting. Owners present at the Annual Meeting discussed concerns with renters to include parking, noise, pets and occupancy. Please be sure to post a copy of the House Rules in your unit as the House Rules address many important items such as parking, noise and pets. Regarding occupancy, Town guidelines are to be followed by all Owners, renters and tenants at 2 people per bedroom. Additionally, please be sure to inform your renters that parking is not permitted in "other units" driveways and smoking is not to take place outside (to include the hot tub) of any substance as it creates a nuisance for neighbors. Please remember that you are responsible for all occupants of your unit.

Thank you all for your attention to these items and Best Wishes to All for a Safe and Happy Winter Season!
